

# Equine Studies

**Don't miss out!**

Only a handful of places left

**Weekend One: Friday 15 to Sunday 17 April 2016**

**An ideal opportunity to explore the field of equine osteopathy. Attend as a **standalone course** or as part of a **validated animal programme**.**

Over the course of 4 weekends, you'll be exposed to a range of assessment tools & techniques to include osteopathic evaluation, structural and soft tissue techniques.

**Course content:** • Health and safety, ethics and the law • Behavioural science – understanding how to work with equine patients • Dealing with sick animals and communicating with owners • Muscular-skeletal anatomy • Normal gait patterns in the equine patient • Case histories, analysis and reports • Osteopathic evaluation, assessment and technique • Common orthopaedic conditions in the equine patient • Professional communications and referrals • Portfolio – reflective writing skills

*“There is hands-on practical from weekend one, so no endless hours of theory, wondering when the practical session will start”*

Glenn Sontag, Canine Studies student

**To find out more and to apply visit [www.eso.ac.uk](http://www.eso.ac.uk)**

Cost: £1,250 (flexible payments available)
