

# Expand your practice - train in Manipulative therapy for animals

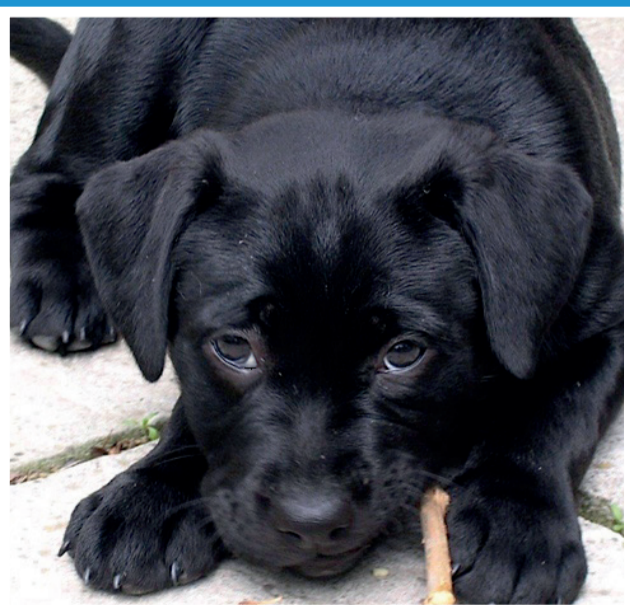

## Open to:

Osteopaths,  
student osteopaths  
& appropriate  
para-professionals\*

## Foundation Course in Animal Osteopathy **starts April 2017**

Whether you're looking for an exciting and rewarding adjunct to existing skills or taking the first step towards further study in manual therapy, these Foundation Courses will give you **an outstanding basis for your career with animals.**\*

Join us this April and study on one of the best animal foundation programmes in the UK. Delivered over the course of **4 weekends**, you'll learn from our team of passionate and experienced lecturers, who together have well over 40 years experience in animal practice.

These courses will equip you with a range of manual therapy techniques, including soft tissue massage, stretching and structural articulation, with **hours of hands-on practical on live models.** Theoretical elements will be conveyed through directed study wherever possible, maximising the time spent interacting with our horses and dogs.

Equine pathway: April 29, May 27, June 17, July 8  
Canine pathway: April 30, May 28, June 18, July 9

Choose one 4-day pathway (Canine or Equine) for £750  
or attend both for £1499 - includes lunch and refreshments

**Limited Early Bird discounts - Book by 28th February**

\* Please note: if you are not an osteopath, you may not use the term 'osteopath' or any such variation when advertising yourself in the UK. You may, however, use terms such as 'manual therapy' or 'body work' when describing techniques taught on this course. All animal treatment requires prior consent from the animal's vet and practitioners must work within their scope of practice - for further information please refer to the ESO website. Due to higher running costs, all ESO animal courses are subject to sufficient delegate bookings.
