<p>Course content</p>	<ul style="list-style-type: none"> • Animal behaviour - ethics in animal care • Functional muscular-skeletal anatomy • Professional studies - Paraprofessional communisaiotns and referrals • Case history analysis and record taking • Gait analysis • Osteopathic assessment and evaluation - clinical reasoning • Osteopathic structural articulation and stretching and soft tissue techniques • Common orthopaedic conditions - clinical reasoning
<p>Note</p>	<p>Dogs: Although sufficient canine models will be available to meet the needs of each class, to maximise the learning experience students are, where logistically possible, encouraged to bring a well-behaved dog with them. This would include dogs that are happy to be handled and be in the same room as other dogs. All dogs should have their own insurance.</p> <p>Notes: Please note that minimum numbers will be required in order to run this course. If minimum numbers are not met the AOI reserves the right to cancel the course. If for any reason, AOI has to cancel the course, (either due to inadequate numbers, adverse weather conditions or failure on the behalf of our third-party facilities), you will be refunded in full. However, as a result of having a minimum number requirement (due to the high cost nature of this course), we do not advise you to pay for any hotels, flights or travel arrangements in advance without cancellation options. AOI cannot be held responsible for any costs incurred as a result of such pre-booking.</p>
