

## Canine level II Module 6 Veterinary insight and approach to treatment, osteopathic considerations, osteopathic integration and teaching clinic CPD course 2021

### Workshop

**Dates:** 14th/15th December 2021

**Timetable:** 9.30-16.30 hrs each day.

**Number of CPD hours:** 14 hours

This is module 6 of the Level II Osteopathic Approach to the canine patient course, allowing you to develop your osteopathic skills for the canine patient, continuing on from the level I/Foundation course. This module looks at Veterinary insight and approach to treatment, osteopathic considerations, osteopathic integration and teaching clinic

This is the final module in the Level II series. The aim of this module is to ensure students understand veterinary approaches to treating common conditions, veterinary protocol and the impact of these interventions on the canine patient in order to enhance practitioners' ability to work alongside veterinary professionals, support veterinary intervention and treat effectively pre and post surgery. Use your knowledge gained to further deepen your osteopathic considerations, understanding and integration of concepts, assessment and techniques developed throughout the Level II modules. Apply your knowledge within a teaching clinic setting to ensure your confidence assessing and treating the canine in a supported environment.

The Level II Osteopathic Approach to the canine patient course runs over modules 1-6 with a pre-requisite module 0 (a total of 20 days). Modules can be taken in succession or chosen from as required. The aim of the course is to offer practitioners a deeper knowledge to support and develop their animal practice. Successful completion and comprehension of the content will give practitioners all they need to enter our Stage III workshops with confidence.

<p><b>Award</b></p>	<p>Those who successfully complete the 2-day workshop will be awarded an AOI/ESO CPD Certificate of Attendance: The canine patient: veterinary insight, osteopathic considerations and integration.</p> <p>Those who successfully complete all Level II Modules (0-6 inclusive) will receive an AOI/ESO certificate of Osteopathic approach to the canine patient - Level II</p>
<p><b>Open to</b></p>	<p>This course is mainly intended for canine osteopaths &amp; canine/veterinary professionals. <b>All delegates should provide evidence of insurance, which allows them to study/work on/with animals.</b></p>
<p><b>Pre-requisite</b></p>	<p>Experience handling dogs Background in canine manual therapy Equivalent of the AOI's level 1 osteopathic approach to the canine patient or ESO Foundation canine course Undertaken Modules 1-5 inclusive of the AOI Level II series or equivalent (Day 1 of this 2 day CPD course may still be possible to undertake if the aforementioned modules have not been completed - however requests for this will be assessed on a case by case basis and the AOI holds the rights not to accept persons onto the course, day 2 requires the undertaking of the prior modules)</p>
<p><b>Location</b></p>	<p><b>Hampshire/Dorset border (New Forest area)</b></p>
<p><b>Delegate Fees</b></p>	<p><b>Delegate fee: £399</b></p> <p>Deposit: £100 (non-refundable after 19th October 2021). Final course payment: £299 to be paid no later than 16th November 2021.</p> <p>Delegates are responsible for the FULL cost of the course, irrespective of personal circumstances that may lead you to miss individual dates. To hold a place on this course, you need to pay a holding deposit of £199.00 as soon as you have been accepted on the course. This must be paid within 7 days of your acceptance email or you may lose your place. The deposit is 50% refundable until the 19th October 2021, after which time it will become non-refundable, due to the costs that we will incur. AOI will not be held responsible for back transfer fees incurred as a result of payment, any deposits returned will be minus these fees.</p>

<p><b>Course content</b></p>	<ul style="list-style-type: none"> <li>• Explore Veterinary approaches to commonly seen conditions</li> <li>• Discuss current veterinary considerations, interventions, protocols and management</li> <li>• Case based discussion of osteopathic approach, assessment, treatment and management protocols</li> <li>• Have the opportunity for clinical discussions with a vet and to discuss co-treatment strategies</li> <li>• Utilise your understanding of osteopathic and veterinary approaches to consider Total lesion concepts and hypothesis rationale</li> <li>• Teaching clinic - Ensure your confidence in assessing and treating the canine patient in a supportive environment.</li> <li>• Undertake start to finish assessment and treatment protocols utilising the osteopathic sieve, form working hypotheses, discuss technique and management plans and undertake effective treatment in a clinical situation.</li> </ul>
<p><b>Note</b></p>	<p><b>Dogs:</b> Although sufficient canine models will be available to meet the needs of each class, <b>to maximise the learning experience students are, where logistically possible, encouraged to bring a well-behaved dog with them.</b> This would include dogs that are happy to be handled and be in the same room as other dogs. All dogs should have their own insurance.</p> <p><b>Notes:</b> Please note that minimum numbers will be required in order to run this course. If minimum numbers are not met the AOI reserves the right to cancel the course. If for any reason, AOI has to cancel the course, (either due to inadequate numbers, adverse weather conditions or failure on the behalf of our third-party facilities), you will be refunded in full. However, as a result of having a minimum number requirement (due to the high cost nature of this course), we do not advise you to pay for any hotels, flights or travel arrangements in advance without cancellation options. AOI cannot be held responsible for any costs incurred as a result of such pre-booking.</p>
